

How to authorize via the MetaMask mobile application

Authorization using a mobile application

To register/authorize on the platform from your phone, you need to install the MetaMask wallet.

Authorization is shown using the iOS OS as an example.

If the wallet is installed:

1. Open the MetaMask application on your mobile phone
2. Check if the BNB Smart Chain network is installed, to do this you need to click on the drop-down list of networks

If the network is installed, select the BNB Smart Chain network and click "Add Network"

If the network is not added:

- Click on "Add network"
- Find BNB Smart Chain in the list and click on "Add"
- Confirm adding the network by clicking on "Approve"
- Next, click on "Switch to network" to switch to the network
- BNB Smart Chain added to wallet

3. Next, at the bottom of the screen, click on "Browser"
4. In the address bar of the browser you must enter the website address <https://in-pool.net/>
5. Next, you need to log in to the site by clicking on "Login to the platform"
6. Connect to the site
7. Sign authorization
8. The mobile version of the site opens

The user can see available projects and invest in them only if the required fields Telegram, E-mail, Country on the "Account" tab are filled in

In order to fill in the required fields, you must scroll the page to the data entry block
