

How to invest in a project from a computer

How to invest in a project from a computer

To gain access to all the features of the platform, you must fill in the E-mail, Telegram, Country fields on the "Account" tab. Without filling in the required fields, access to projects is limited

After successful authorization on the platform from your computer, you can familiarize yourself with the proposed projects and select a project for investment.

To do this, go to the "Projects" tab. Projects available for investment are located

in the "Available investment projects" section in the "Active" status

If you have already invested in a project and want to invest more, the project will be in the "Your Allocations" section in the "Active" status

The user can open the project of interest by clicking on the project card and view the details

In the "Status" section you can see the progress of the collection and invest the desired amount. To do this, enter the investment in the "Amount" field and click "Confirm"

We confirm the transaction in the wallet

After confirmation from the network and platform, you can invest by clicking on "Submit"

We confirm the transaction in the wallet again.

The project page will display the amount of tokens that the user has invested in the project.

General investor statistics on the platform can be viewed on the "Home" tab
