

How to invest in a project from a mobile MetaMask app

How to invest in a project from your phone

To gain access to all the features of the platform, you must fill in the E-mail, Telegram, Country fields on the "Account" tab. Without filling in the required fields, access to projects is limited

Investing in a project is shown using the iOS OS as an example.

After successful authorization on the platform from your phone, you can familiarize yourself with the proposed projects and select a project for investment.

To do this, go to the "Projects" tab. Projects available for investment are located in the section "Available investment projects".

If you have already invested in the project and want to invest more, the project will be in the "Your IP" section in the "Active" status

The user can open the project of interest and view the project details

In the "Status" section you can see the progress of the collection and invest the desired amount. To do this, enter the investment in the "Amount" field and click "Submit" and confirm the action in the wallet.

After confirmation from the network and platform, you can invest by clicking on "Send", we confirm the transaction in the wallet. The project page will display the amount of funds that the user invested in the project

General general investor statistics for all projects can be viewed on the "Home" page
