Instruction how to work with InvestHub platform

InvestHub is Web3 Platform for Investing in Various Projects via Blockchain

The platform presents verified projects from various investment sectors, with assessments from analysts and experts in different investment fields.

Instructions for Using the Platform

1. To use the platform, you need a MetaMask wallet.

If you haven't installed MetaMask yet, you can follow the instructions at the links below:

- [Installing MetaMask in the browser](#)
- [Installing the MetaMask mobile application](#)

The MetaMask interface language depends on the language set in your browser or on your phone.

2. Authorization on the platform

To register/log in to the platform, you need to:

- Go to the InvestHub platform website
- [How to authorize via MetaMask through the browser](#)
- [How to authorize via the MetaMask mobile application](#)

3. Fill in required fields

After authorization, the platform's main page with statistics opens by default. To access all the platform's features, you need to go to the 'Account' tab and fill in the fields for Email, Telegram, and Country. Without filling in the mandatory fields, access to projects is restricted

4. Add BNB Smart Chain

The platform operates with the Binance Smart Chain network. To invest in a project, it is necessary for this network to be added to the wallet, and there must be BNB tokens in the account.

Transaction fees are paid in BNB.

- [Adding new network in the mobile app](#)

5. Add Tokens to the Wallet

Investments on the platform are carried out in USDT tokens, as indicated in the project card. The platform operates on the BSC network, and transaction fees are paid in BNB. By default, tokens are not displayed in the wallet, even if they are sent to it. To import the necessary tokens, you can find out by following the links below:

- [How to add tokens to MetaMask for display on your computer](#)
- How to add tokens to MetaMask for display in mobile app

6. After configuring the wallet, you can start investing in projects
