

How to add NFT to MetaMask wallet

In order to add NFT to the MetaMask wallet, you need to import the NFT token

1. Go to your project with NFT
2. Click on the NFT button on the project page

The screenshot shows the InPool website interface. At the top, there are statistics: Total investments: 473,858 \$, Total amount of projects: 31, and Refunded by investors: 40,551.66 \$. A user account is logged in as 0x87...75A1. A 'LOG OUT' button is visible. The left sidebar contains navigation links: Home, Projects (selected), NFT Marketplace, My Investors, Tutorial, Support, and Account. The main content area displays 'Revenue Wagon 01' with a 'Basic Information' tab. An 'NFT' button is highlighted with a red box. Below the button, there is a table of project details:

Condition	In work	Fee price	0 %
Lot price	320 USDT +	IP Start	09/2023
Token network	BSC	Stablecoin	USDT
IP Type	Business loans	Network	BSC (BEP20)
IP Currency	RUB (RUB)	Invest Strategy	Passive income

Below the table, there is a section for 'IP Conditions' and 'Analytics'. The 'Analytics' section includes the text: 'Investments with minimal risk. The investor receives a stable passive income monthly until the end of the wagon's life or the effective resale of the asset. The approximate duratio... Show more'.

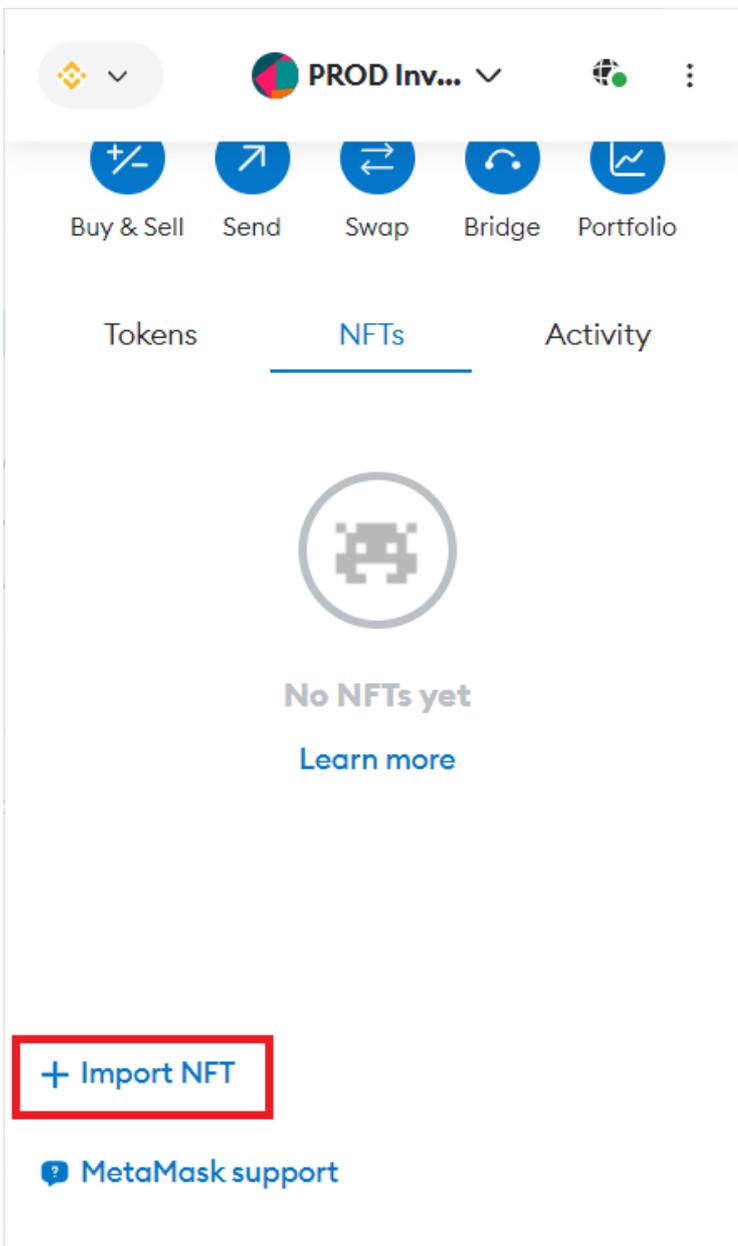

3. The NFT data displays the "Address" and "Token id" fields, the values of these fields need to be imported into the MetaMask wallet

On Sale:	No	IP Type:	Business loans

Close

4. Open MetaMask wallet - NFT tab and click on Import NFT button

5. Copy and paste the contract address and id values. Click "Import"

6. NFT has been successfully added to your wallet!

Sometimes errors may occur on the Metamask side when importing NFTs. In this case, try the following:

1. Update Metamask app to the latest version
2. Change network. For example, select Ethereum Main Network , then change the network back to BNB Smart Chain
3. Try adding NFT again
